DWIGHT ANGELO DECENA

Mobile & Web Application Developer

SUMMARY

4th-year BS Information Technology student at National University Dasmariñas, majoring in Mobile and Web Application Development and enrolled in the OJT practicum. I build full-stack web systems and cross-platform mobile apps with React, React Native (Expo), Flutter and Supabase, from Figma wireframes to deployment. Certified IT Specialist in Databases (914/1000) and Dean's Lister. Looking for a paid OJT or internship with a path to full-time work after graduation.

EDUCATION

BS in Information Technology — Mobile & Web Application Development Aug 2023 – Present

National University Dasmariñas · Sampaloc 1, Dasmariñas, Cavite

- Dean's List, Second Honor — Rank 6, BSIT-MWA (A.Y. 2025–2026, 3rd term)
- Relevant coursework: systems analysis & design, SDLC and Agile/Scrum, relational database design, SQL, cross-platform mobile development, RESTful APIs

CERTIFICATION

Information Technology Specialist — Databases · Certiport / Pearson VUE · score 914 / 1000 Sep 2025 – Sep 2030

PROJECTS

Bridges of Hope — Case-management system for an inpatient recovery facility CAPSTONE · TEAM OF 4

Lead web & backend developer, repository owner · React, JavaScript, Tailwind CSS, Supabase, React Native (Expo), TypeScript · bridgesofhope-delta.vercel.app

- Built the web portal for admins, nurses and program staff: admissions, discharges, ward and room management, patient records, analytics and PDF reports.
- Set up the project structure and role-based routing; implemented authentication, security features, notifications and branded email on Supabase (Postgres, Auth, Row Level Security).
- Added AI-assisted drafting with the Groq API; contributed sign-in flows and family tabs to the families' React Native app.
- Top contributor to the web portal (56 of 120 commits), Supabase backend (23 of 42) and admin pages (41 of 66); wrote the README, PRD and architecture docs.

Rhayz Kicks — Sneaker store and retail operations system SOLO Aug – Oct 2026

React, TypeScript, Vite, Supabase, Flutter (Dart), Laravel 13 REST API (PHP), PayMongo · rhayz-kicks.vercel.app

- Designed and built the whole system alone: a storefront with cart, wishlist, PayMongo checkout, loyalty points and vouchers.
- Back office with point of sale, inventory and stock movements, delivery-stage order tracking, vendors and purchase orders, staff hours, CMS and a KPI dashboard.
- Modelled a 27-table Supabase schema with an ERD; built a Flutter customer app on Supabase and a Laravel REST API with realtime sync.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, Dart, PHP, SQL, HTML, CSS
Mobile	React Native (Expo), Flutter
Web	React, Vite, Tailwind CSS, React Router
Backend & data	Supabase (Postgres, Auth, Realtime, RLS, Edge Functions), PostgreSQL, MySQL, Laravel REST APIs
Tools	Git/GitHub, Vercel, Expo EAS, Figma, VS Code, Android Studio
