# DWIGHT ANGELO DECENA

**Curriculum Vitae | Software Engineering & Mobile Systems Developer**

**Address:** General Trias, Cavite 4107, Philippines
**Phone:** +63 977 346 4090
**Email:** dwightangelodecena@gmail.com
**GitHub:** github.com/dwightangelodecena-cloud

## ACADEMIC & PROFESSIONAL PROFILE

Graduating 4th-year Bachelor of Science in Information Technology student at National University Dasmariñas, specializing in Mobile and Web Application Development. Proven track record of architecting and building multi-platform enterprise systems solo—spanning backend database design, custom REST APIs, web administrative clients, and native cross-platform mobile apps. Certified IT Specialist in Database Systems with expert proficiency in React, React Native (Expo), Flutter (Dart), TypeScript, Supabase, MySQL, and Laravel. Seeking an On-the-Job Training (OJT) / Internship placement with direct software engineering responsibilities and career transition potential.

## PROFESSIONAL CERTIFICATION

**IT Specialist — Database Systems**
Certiport / Pearson VUE Credential Validation | Valid: September 2025 – September 2030

## TECHNICAL COMPETENCY MATRIX

| Technical Domain | Frameworks, Languages & Infrastructure |
|---|---|
| **Mobile Engineering** | Flutter (Dart), React Native (Expo), TypeScript, Cross-Platform Mobile UI Architecture |
| **Web Engineering** | React, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS |
| **Backend & API** | Supabase (Auth, Realtime, RLS), Laravel REST API Framework, Node.js Environment |
| **Database Systems** | MySQL, SQL Query Optimization, Relational Schema Design, Database Normalization |
| **DevOps & Tooling** | Git, GitHub, Vercel Continuous Deployment, Postman API Testing, VS Code |

## HIGHER EDUCATION

**Bachelor of Science in Information Technology** — **2023 – Present**
**Specialization in Mobile and Web Application Development**
National University Dasmariñas — Sampaloc 1, Dasmariñas, Cavite
• Status: 4th Year Senior Student (Enrolled in On-the-Job Training Practicum)

## FEATURED SOFTWARE ENGINEERING PROJECTS

### Rhayz Kicks — Full-Stack E-Commerce & Enterprise Retail Operations Suite

**Solo Full-Stack Architect**

**Stack: React, TypeScript, Flutter (Dart), Supabase Backend, Laravel REST API, PayMongo Payment Gateway, Vercel**

- **Solo End-to-End Execution:** Architected, built, and deployed the complete multi-platform ecosystem independently—including relational schema design, custom Laravel REST API endpoints, Supabase backend integration, responsive web back-office, and mobile application.
- **Enterprise Retail & POS Module:** Built an integrated Point of Sale (POS) interface, real-time multi-branch inventory tracking system, dynamic customer loyalty rewards program, and automated order fulfillment tracking.
- **Payment Gateway & Companion Mobile App:** Integrated PayMongo API for secure credit card and e-wallet checkouts, while authoring a dedicated native cross-platform mobile app in Flutter (Dart) for on-the-go management.
- **Database & API Security:** Enforced granular database access control policies, normalized relational tables, and optimized API payloads for real-time mobile and web operations.

### Bridges of Hope — Inpatient Recovery Facility Case-Management System

**Lead Capstone Application Developer**

**Stack: Web (React, JavaScript, Tailwind CSS) | Mobile (React Native with Expo, TypeScript) | Backend (Supabase)**

- **Healthcare Case-Management Architecture:** Architected a dedicated healthcare platform engineered specifically for an inpatient recovery facility to digitize admission workflows, clinical tracking, progress notes, and staff schedules.
- **Dual-Client Stack (Web & Mobile):** Built a desktop administrative web panel using React and Tailwind CSS alongside a portable mobile app built with React Native (Expo) and TypeScript for clinical staff on the floor.
- **Real-Time Data Security & RBAC:** Implemented Supabase for secure multi-role user authentication, real-time patient record synchronization, and strict Row-Level Security (RLS) policies to safeguard sensitive medical data.
- **Workflow Optimization:** Replaced paper-based medical logging with structured database triggers, audit trails, and automated patient status notifications.

## RELEVANT ACADEMIC COURSEWORK & SPECIALIZED TRAINING

**Mobile & Web Systems**
Cross-Platform Development, React Native, Flutter, Dynamic State Management, Mobile UI/UX Patterns

**Database Administration**
Relational Database Design, SQL Query Optimization, Data Normalization, Transaction Management & Security

**Software Engineering**
System Analysis & Design, Software Development Life Cycle (SDLC), Agile/Scrum Methodologies, UML Diagramming

**Backend Architecture**
RESTful API Architecture, Cloud Backend Services (Supabase), Middleware Auth, Token Security

## SOFTWARE ENGINEERING PRACTICES & METHODOLOGIES

**Full-Stack Architecture**
Designing seamless communication between front-end web/mobile apps and backend databases using structured REST APIs and real-time websockets.

**Database Optimization**
Crafting normalized 3NF schema layouts, writing optimized SQL join queries, and configuring Row-Level Security rules.

## PROFESSIONAL COMPETENCIES & SOFT SKILLS

- **Analytical Problem Solving:** Efficient root-cause debugging, error tracking, and query performance tuning.
- **Agile Collaboration:** Experienced in Git branch workflows, pull request reviews, and iterative sprint cycles.
- **Technical Documentation:** Writing clear API specifications, database schema ERDs, and deployment manuals.
- **Adaptability & Self-Learning:** Rapid mastery of modern SDKs, emerging frameworks, and cloud infrastructure APIs.

## CHARACTER REFERENCES

Academic and professional references from National University Dasmariñas IT Department faculty members, capstone project advisors, and technical instructors are available immediately upon request.
