DWIGHT ANGELO DECENA

Full-Stack Mobile & Web Developer | BS Information Technology Senior

📍 General Trias, Cavite 4107 ✉ dwightangelodecena@gmail.com 📞 +63 977 346 4090 🔗 github.com/dwightangelodecena-cloud

PROFESSIONAL SUMMARY

4th-year Information Technology senior at National University Dasmariñas specializing in full-stack mobile and web systems. Certified IT Specialist in Database Systems with experience building production-grade platforms spanning React, React Native (Expo), Flutter, TypeScript, Supabase, and custom Laravel APIs. Skilled in database schema design, RESTful API development, cross-platform mobile apps, and payment integration. Seeking an OJT / Internship software engineering role.

TECHNICAL COMPETENCIES

Mobile Engineering	Flutter (Dart), React Native (Expo), TypeScript, Cross-Platform Architecture
Web Development	React, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS
Backend & API	Supabase (Auth, Realtime, RLS), Laravel REST API, Node.js Environment
Database & Tools	MySQL, Relational Schema Design, SQL Optimization, Git, GitHub, Vercel

FEATURED SOFTWARE PROJECTS

Rhayz Kicks — Full-Stack E-Commerce & Retail Operations System

Solo Lead Architect & Developer

Tech Stack: React, TypeScript, Flutter, Supabase, Laravel API, PayMongo, Vercel

- **Solo End-to-End Development:** Architected the entire system independently—including database schema, Laravel REST endpoints, Supabase real-time sync, web portal, and mobile app.
- **Enterprise Retail Suite:** Engineered Point of Sale (POS), real-time inventory tracking, customer loyalty rewards, and automated delivery fulfillment pipelines.
- **Payments & Mobile Client:** Integrated PayMongo gateway for digital checkouts and authored a companion mobile app in Flutter (Dart).

Bridges of Hope — Inpatient Recovery Case-Management System

Capstone Lead Developer

Tech Stack: Web (React, JavaScript, Tailwind CSS) | Mobile (React Native / Expo, TypeScript) | Backend (Supabase)

- **Clinical Healthcare Platform:** Architected a case-management platform for an inpatient recovery facility to digitize admissions, medical records, and patient tracking.
- **Multi-Client Architecture:** Built a React web admin panel alongside a portable mobile app using React Native (Expo) and TypeScript for clinical staff.
- **Real-Time Security & RBAC:** Configured Supabase multi-role authentication, real-time sync, and Row-Level Security policies to protect medical data.

EDUCATION & PROFESSIONAL CERTIFICATION

BS in Information Technology
Mobile & Web Application Development Specialization
National University Dasmariñas | 2023 – Present (4th Year Senior)

IT Specialist - Database Systems
Pearson VUE / Certiport Credential Validation
Valid Period: Sep 2025 – Sep 2030
